## Journal to Sponsor Hockey Contest

Fans Must Guess Final Senior League Standing—Contest Ends December 10.

At the request of several Journal readers and hockey fans The Journal will sponsor a hockey contest. Here is what you have to do.

List what in your opinion will be the final standing in the Alberta senior hockey league. To avoid ties, state how many games you expect your first two teams to win and lose. Each team plays 32 games, 16 home and 16 away. Attach your name and address to your entry and mail it to The Journal office. Contest closes Sat. Dec. 10. All teams in the circuit will have been in action on two or more occasions and fans will have had a chance to study their performances.

All entries will be published in The Journal along with the contestants' names.

The winner will be judged on the final standing of the league as released by the Alberta Hockey League. A year's subscription to The Journal will be awarded the winner. Don't delay—send your entries in now to Contest Editor, Coleman Journal.

### THE POOR ABUSED TAXPAYER FOOTS THE BILL

Employees of the Canadian government are paid annually a total of \$77 million, which, it must be admitted, is a strikingly large payroll for a population of 11 million people to foot each year.

If that were all, it would not be too bad, but on top of that are the payrolls of the provincial governments, as well as the civic employees of cities, towns, townships and villages. Each year the handful of people which comprise the Canadian nation must dig up a comparatively enormous sum of money to pay the employees in every kind of government from municipal to federal.

Of course, a capable manned civil service is desirable. To obtain such, adequate salaries must be paid. But the total number of the various civil services of Canada is strikingly out of proportion with the population of the country. And, as Mark Twain commented about the weather, so it is about overlapping of governments and the increasing list of civil servants and civic employees—there's a lot of talk, but nobody does anything about it. So the poor abused taxpayer just continues to pay and pay and pay—Bownmanville Statesman.

FLOWERS—Order your flowers from Coleman Greenhouse, W. H. Garner, proprietor. Phone 241w. We deliver.

## The Journal's Hockey Special Next Week

Through the sponsorship of eleven gentlemen of Coleman, a double page spread with photos of Coleman Canadians and descriptive material will be published in the next issue of The Journal, and 1500 copies additional distributed in the district. The Journal expresses its appreciation of the enterprise of those sponsoring the special page, which will create keen interest throughout the entire Pass area and beyond.

## Boys Band Making Progress

The six week old boy's band, organized under the leadership of Captain Hewitt of the Salvation Army is making definite headway in musical ability. At the last band practice fourteen members were present, the combination comprising two cornets, one trumpet, two clarinettes, one flugel horn, three tenor horns, one trombone, one euphonium, one saxophone, and one bass instrument. Scales are being practiced on a competitive basis, a brand new music stand being the prize to execute all the scales. Already a simple tune has been played quite effectively.

Any persons having any discarded music stands would assist the endeavors of the band by donating same to members of the organization.

It is expected that the band will be sufficiently advanced for the Salvation Army Christmas concert to play one or two items. Remember the date of the concert, Friday, Dec. 22.

## Local News

Mrs. Cornett returned last week after spending the summer very pleasantly in the city of Vancouver.

The funeral of Angelo Chiesa, aged 63, of Beaver Mines was held from the residence of Mr. Primo Lant, East Coleman, on Sunday, and proceeded to Holy Ghost church where Father Dunbar conducted the services. Deceased was born in Italy and for many years had farmed in the Beaver Mines district.

The Christmas edition of the War Cry, well-known publication of the Salvation Army, is exceptionally fine. It has a nicely colored cover depicting the wise men from the east bringing their gifts to the new-born infant Jesus, and from cover to cover it furnishes a wealth of interesting reading. By all means purchase a copy, now on sale at ten cents.

Eleven tables were in play at the bridge party in St. Alban's hall on Friday evening, at which the prizes were won by Mrs. A. F. Short, Mrs. P. Wagner, Mr. W. L. Taylor and Mr. J. J. McIntyre. This is very encouraging to members of the vestry, Walter Williams and Burpee Steeves, who are sponsoring these gatherings, the proceeds of which go to church funds.

### In Memoriam

IN LOVING MEMORY of our dear husband and father, Robert Fairall, who was killed in the McGillivray mine explosion, Nov. 23, 1926.  
"To Memory Ever Dear."  
—Inserted by his widow and daughter, Calgary, Alberta.

### IN MEMORIAM

CORNETT—In loving memory of Alex. S. Cornett, who died November 27, 1938.  
More and more each day we miss him; Friends may think the wound, is healed;  
But they little know the sorrow  
Lying within our hearts concealed.  
—Sadly missed by his wife and family.

## Pee Wee Hockey League Re-Organized

A re-organization meeting of Pee Wee hockey sponsors and league executive met on Monday evening. Five teams placed their league entry before the meeting: the Elks, Slovaks, Polish, Italians and Pattinson's. Any other organization wishing to sponsor a team should inform Mr. Ray Spillers, league secretary, as soon as possible. A schedule will be drawn up. Practices will be held on the open air rink.

Officers include: President F. Abousafy; secretary Ray Spillers; executive, J. McDonald, R. Pattinson, J. Salvador, H. Nurcombe, R. Bell and J. Wavrecan.

## The Churches

ST. ALBAN'S CHURCH  
Rev. J. R. Hague, Incumbent.  
2.30 p.m., Sunday school.  
7 p.m., Evensong and sermon.

Peace is not just the absence of war. Peace is creative friendship between men. And it is based upon justice. Our age is marked by strife between persons, classes, races and nations. Even churches fight one another. It is no use "to cry Peace, Peace, when there is no peace." Even robbers love peace that they may enjoy stolen booty. What tortured Christ must torture His followers: to see men outraged by injustice. Nothing so defames the church or drives men from her as when her members smooth over injustice, or look the other way. Am I, or my class, my race, my country, withholding what rightly belongs to another? Let us turn back to the Commandments: Thou shalt not kill... commit adultery... steal... lie... covet. For love's sake, "let justice roll down as waters and righteousness as a mighty stream."

### THE UNITED CHURCH

The increased interest in the evening service is being maintained. There were 11 male voices in a choir of 26 persons on Sunday evening. For the evening service this coming Sunday, the address will be based on John Masfield's well known poem "The Everlasting Mercy." This is the story of the sudden awakening of a drunken prize fighter and poacher. The service is planned to have a definitely evangelistic appeal. The morning service will be at the usual hour, with the church school following. Anyone having no other church home is cordially invited to attend the services.

### THE SALVATION ARMY

Capt. and Mrs. Fred Hewitt, officers in charge.  
Services of the Week  
Sunday: 10.30 a.m., Children's district studies;  
2.30 p.m., Sunday school;  
7.30 p.m., Evening service.  
Tues., 7.30 p.m., Home League, ladies' meeting.  
Wed., 7.00 p.m., Boys' band practice.  
Thurs., 8.00 p.m., Singing company practice.  
Fri., 7.00 p.m., Young peoples' meeting.

Preliminary Announcement  
An extraordinarily beautiful Christmas pageant is to be presented in the Salvation Army hall on Christmas Day at 7.30 p.m. Will as many as possible set this sacred evening aside, that worship and praise may be offered in the House of God on this Christmas Day.

### CHURCH OF THE NAZARENE

Services: Sunday school at 11 a.m.; this Sunday will be the last in this Red and Blue coat, everybody please be on hand. Morning worship at 12 o'clock. Communion service commemorating the Lord's supper. Evangelistic services 7.30 p.m., special singing.

Tuesday evening at 7.30, Bible study. Lesson: Book of Ezra.  
Friday evening at 7.30, Missionary meeting. A general survey of the work in all foreign fields will be given. This will be an interesting service.

FIREWOOD: Load logs \$8.00, blocks \$5.00, stove length \$4.00, delivered in town. Phone Co-operative No. 13, or 209. Or drop postcard in office. Joe Michalsky, Coleman.

## Boy Scout and Girl Guide Notes

### Elks Lodge Sponsoring Coleman Scouts

Our meeting was fairly attended, ten being present; one a new recruit. More boys are needed to form patrols and carry on Scout work.

Tom Llewellyn is an assistant scoutmaster. He was formerly in the First Coleman Troop and the boys are pleased to see him back again.

The meeting place has been changed to the miners hall, which is much more suitable for Scout meetings. It is provided through the sponsorship of the Elks Lodge, who have kindly agreed to pay the rent.

The troop is planning to organize a hockey team. The regular meetings will be every Wednesday at 7 p.m.

We expect to form patrols at the next meeting. All Scouts should be present, as patrol leaders will be chosen. All boys from 12 to 16 years who are interested are welcome to join the troop.—Your Scout correspondent, Billy Milley.

## Canadians Had First Practice At Arena Wednesday

A large crowd of hockey fans on Wednesday evening watched coach Mike Kryschuk put his team through their first local practice this season.

Nineteen players went through a number of drills. Two forward lines, comprising Rediaski, Sprout and McKillop, on one line, and Bill Fraser, Lopichuk and Sanderson, on the other, were the pick of the four forward lines that were in action. Coach Kryschuk does not seem to have decided how he will team up his defencemen, as it was noticed all five defencemen were moved around in an effort to determine the strongest duo.

Weather permitting, the team will practice regularly from now on till their first game with Turner Valley, Dec. 5.

Canadians practiced at Lethbridge arena over the week-end. Improvement in form was noted. Lethbridge brewers paid for the use of the arena, also for the practices the week-end of Nov. 5. Their kindness is appreciated by the club executive.

Ray Spillers, manager of Coleman Juveniles, reported the dance sponsored by the club last Friday evening a success. Members of the team sold sufficient tickets to net the club a profit which will be used to buy equipment. Another dance will be sponsored on Dec. 9.

## Journal's Weekly Letter From Edmonton

Edmonton, Nov. 21.—Conservation of oil and gas in the Turner Valley field—the artificial restriction of production in order to preserve the market—continued to occupy the special session of the Alberta legislature as this week opened.

Some measure of opinion marked debates in the house itself and in its committees on the subject. The fact that in the past members of the Social Credit side have peered at artificial restriction of production of other products in various parts of the world—such as coffee in Brazil and grain in the United States, when those products are needed in the world—made it difficult for some of the members to approve the conservation idea at home.

It was revealed during the hearing. (Continued on Back Page)

## Boys And Girls, \$10 In Prizes!

Last week we received donations of \$10 for our prizes from friends of the Pass. We are therefore offering \$10 this week in prizes. We will give a First Prize of \$5, a Second Prize of \$2.50, a Third Prize of \$1, a Fourth Prize of 75c, a Fifth Prize of 50c, and a Sixth Prize of 25c, for the largest number which can be made by adding the figures on automobile license plates seen in the Pass. Should there be a tie, the largest license plate number itself will count.

For instance, if you see a car with license plate 36-123, the number

would be 15. If you see one with license plate 20-583, the number would be 19, but it would win over 20-585, because the license plate number itself would be larger. Should the same winning license plate be submitted by two contestants, the total value of the first two prizes will be divided between them, and so on.

In the milk bottle shown here, you will find a place for your name, and the date when you saw the automobile carrying the license plate with the big number.  
Find out who owns the car, and then fill in the milk bottle giving your name, date, the license plate number, where you saw it, owner of the car and the number to which the figures on the license plate add up. In all the stores listed below you will find the same ballot boxes as we used last week. Put your property filled out paper milk bottle into one of these ballot boxes no later than one o'clock on Wednesday afternoon.

You can put in as many entries as you like, so that if you see a number on Saturday and put in a milk bottle, and then see a bigger number on Sunday or Monday you can put in another milk bottle; and if you see a still bigger number on Tuesday or Wednesday you can put in a third milk bottle.

We shall have to check the names of the owners of the cars with the R. C. M. P. and therefore will not be able to announce the winners until next Friday.

REMEMBER, you must see the car in the Crow's Nest Pass.  
This is a good game to play when you are out in your car for a drive with your father on Sunday afternoon.

Leave your entries at the following stores which sell Meadow Sweet Dairy Products:

Coleman: Coleman Cafe, Jimmy's Coffee Shop and White Lunch Cafe, Blairmore: Carl's Cafe, Rex Cafe, Royal Cafe and Greenhill Grill.

Frank: Mc Coy.  
Bellevue: Hayson's Ice Cream Bar, Bellevue Cafe and Alberta Cafe.

Hilcrest: B. C. Cafe.

## \$50 In Prizes

Several residents of the Pass have been so struck with the value to a community of the information contained in an Article which appeared in the November 26th issue of Liberty Magazine that we are able to offer substantial Prizes in a competition designed to promote a wider knowledge of the Article. We have prepared a list of 50 questions, the answers to most of which are given word for word in the Article.

We are prepared to award a First Prize of \$25, a Second Prize of \$10, and Three Consolation Prizes of \$5 each for the best answers to these questions or a smaller number of questions selected from among them. The questions are very simple. For instance, here is question No. 13:

Q. Why did Nathan Straus decide to make it possible for poor children

to have Pasteurized Milk?  
The answer is: Because he had lost a child who had been given milk that contained the diphtheria germ.

Here is question No. 25:  
Q. The author says that Pasteurized Milk cannot be made a substitute for what?

The answer is: Cleanliness and Sanitation.

Here is question No. 28:  
Q. What does the author say is homogenizing milk does to it, so far as human beings are concerned?

The answer is: It makes it more digestible.

Here is question No. 30:  
Q. Milk does not contain sufficient quantities of Vitamin C for a baby. How are extra quantities of Vitamin C given to a baby?

(Continued on Page Eight)

## THIS FRAGRANT SLOW-BURNING DIXIE SAVES MONEY FOR YOU!

### Transient Youth Problem Again

In a recent issue of this column attention was drawn to the plight of that sizeable army of young men wandering up and down the country in vain search for work and, perhaps, in a minority of cases, hunting for relief, when the situation was referred to as a national disgrace, coupled with the suggestion that some provision should be made to give them work and wages.

It was pointed out that there is plenty of work that could be done with profit to the nation and the taxpayers and, in effect, that all that was needed was to connect these transient jobless men with this work.

Since that time these suggestions have found confirmation in an article in the November 12 issue of *Toronto Saturday Night* written by A. J. Elliott, who not only points out the necessity of providing work for these men, but instead of allowing them to be made a shuttlecock between the municipalities and the senior governments, but outlines in some detail the work to which they might well be put and the methods that should be adopted in carrying out the plan.

Since Mr. Elliott is the Superintendent of the Toronto Men's Hostel and has had much experience in social work in the United States and Canada, his suggestions are not only interesting but carry with them the weight of experience and authority.

Mr. Elliott adopts the viewpoint that the problem instead of being insoluble has a relatively simple answer but if it is to be successful "our theory must be changed from the opinion that the federal government is attempting to control a national liability to the conviction that we are actively engaged in conserving a national asset."

In making this statement it would appear that Mr. Elliott is reaching down to the roots of the problem, for, if these men were regarded as a national asset to be conserved, as they undoubtedly are, it would not be very long before the demand that something be done to give them their rightful place in the economic life of the country, or at least a chance for it, would be sufficiently vociferous to bring forth fruit.

#### For Unskilled Labor

As was stated before in this column there is plenty of work that can be done with advantage and Mr. Elliott not only confirms this statement in a general way but points out specifically some of the projects that might well be undertaken when he says:

"Grandiose schemes such as the construction of huge public buildings or super-highways demand large numbers of skilled artisans and trained engineers. The country has not a sufficient number of these to fulfil its normal requirements; and the result is merely to put a premium on the services of such workers.

"But the little jobs, such as changing level crossings to grade crossings, providing possible country roads, eliminating the hazards of pedestrians on highways by constructing footpaths; these, as well as such big jobs as reforestation for instance, require a minimum of skilled workmen and a maximum of laborers. From all of them the general public would derive as much benefit in the long run as the unemployed transients who would be directly assisted thereby."

Mr. Elliott suggests that the men be housed in comfortable and attractive camps, avoiding the mistakes of "our last terrible camp experiment," adding the important warning that the men should not be kept in such camps too long but that every effort be made to provide them with a definite program of education and as soon as possible graduate them into permanent work through the employment bureau scattered across the Dominion. In other words, Mr. Elliott calls for a definitely co-ordinated program of temporary work, education and permanent employment and opportunity for re-establishment as soon as such may be available.

#### Effect On Morale

While all of this is sane and sound, not the least interesting feature of Mr. Elliott's plan is his recommendation as to remuneration. Pointing out that these men who have lost their municipal rights are offspring of families and relatives who cannot afford to keep them, Mr. Elliott urges that they be paid, while engaged in such public projects, a minimum wage of thirty dollars a month and keep, of which five dollars is to be retained by the men and the balance forwarded to the nearest of kin.

Apart altogether from the economic effect of partially or wholly lifting the relief burden from the taxpayers on the family's account such disposition of a substantial percentage of the wages would have a marked effect on the family's morale "if their income was the earned wages of one of their number, instead of relief."

"As well as the chance to conserve its manpower and lighten the burden of relief that now falls so onerously on municipal taxpayers, not to mention the restoration of morale and self-respect to innumerable borderline and relief-receiving families the nation has still another opportunity to benefit from the policy of work for wages," says Mr. Elliott. "And that is the opportunity to provide education facilities to a group of its citizens who would benefit from such a program and who would eagerly avail themselves of it."

Such a program as that outlined by Mr. Elliott will strike a responsive chord in a good many breasts and will be approved not only by taxpayers but parents and relatives who have seen their young men fare forth in the vain hope of conquering the unemployment ogre and who are now being battered about from pillar to post, with hope dwindling the longer this problem remains ineffectively tackled.

#### A Strange Law Suit

Refused in an attempt to check a toothpick in a railway station, a Parisian lawyer sued the French Government in 1907 and won after a 20-year court fight at a cost of 200,000 francs to the Government.

On occasion, rabbits and hoppers will share the same burrow, although they use different entrances.

### PATENTS

AN OFFER TO EVERY INVENTOR. List of inventions and full information sent free. THE PATENT OFFICE, Registered Patent Attorneys, 273 Bank Street, Ottawa, Canada.

#### This Cat Was Wise

Other cats in the neighborhood might spend their nights in song and couraous—but not Tabitha, the large gray Maltese belonging to Miss Gilbert T. Sutton, of Staten Island, New York. That's why Tabitha lived 29 years and seven months, E. M. Ketter, veterinarian, said as the cat was being buried in the garden of her home.

Chestnut trees are most commonly used for telephone poles.

3282

### Troubles Increasing

Man Without Country Is Now Man Without a Ship

John Dolanuk, "the man without a country," is also a man without a ship.

For the United States liner President Roosevelt sailed for Europe without him, refusing to recognize a deportation order issued by the U.S. department of labor.

Dolanuk rode 17,500 miles on the ship's lines last year as an uninvited guest. His officials refused to accept him for deportation on the grounds it was physically impossible to land him in another country.

Dolanuk was born in Austrian territory later ceded to Roumania. Immigration officials said he had entered both Canada and the United States illegally, gone to Spain as a volunteer with the government forces, and later stowed away again for the United States.

Courts have tried vainly to straighten out the jumble of his national status. Great Britain, France, Germany, Roumania among other countries have refused him entry.

### Alberta Oil Possibilities

Should Be In Increasing Demand By British Empire

Alberta oil should be in increased demand by the British Empire because of its high gasoline content. R. A. Brown, J. of Calgary, told the Canadian Institute of Mining and Metallurgy convention at Vancouver.

Turner Valley, producing more than the available market requires, looks to an embargo on oil imports from the United States and expansion of the domestic market through lower freight rates for an increased share of the British market overseas, he said.

Brown said the British Empire now produces only about five per cent. of its crude oil requirements. He discounted the feasibility of a pipeline west to the Pacific seaboard.

Brown expressed belief that as soon as potential production justified a large enough flow of oil, need downward adjustment of railway freight rates would follow.

### Lincoln Was Inventor

Application For Patent For Pontoon Found Among Old Papers

New York has just found an old safe dating back to the middle of the last century. Experts opened it with care, and found inside a number of models and papers. Some of the papers were signed "A. Lincoln, Springfield, Illinois." Investigation revealed that they had been written by the great President Abraham Lincoln himself and were, in fact, part of the statesman's leisure time hobby of invention. Among the contents of the safe was an application by Lincoln to patent a pontoon, which, filled with compressed air, would lift vessels "over bars or through shoals" low water without discharging their cargo.

### Milk And Lemonade

Preferred By British Soldiers In India To Lager

Rudyard Kipling notwithstanding, the modern British soldier in India prefers milk and lemonade to sterner stuff. Authorities attribute a sharp decrease in sunstroke and heat exhaustion to this preference, but the number of hospital admissions is still high. Of the 50,000 British troops in India, 30,000 annually are admitted to hospital, twice the ratio for troops serving at home. For the 150,000 male soldiers the ratio is 390 per 1,000.

### Thinking Is Power

Knowledge No Good Without It States Sir Frederick Banting

Sir Frederick Banting, co-discoverer of insulin and Professor of Medicine at the University of Toronto, told students of Dalhousie University Medical School in Halifax: "Knowledge alone is not power," he said. "It is thinking that is power. There is a danger of too little thought and too much work. The idea is the most valuable thing in research. Ideas come only to the man who asks himself why, and answers the question for himself."

Widows in the Ekma Bena tribes of New Guinea carry the skulls of their departed husbands about with them for the rest of their lives.

According to estimates, some 3,000,000 American school children are handicapped by defective hearing.

FOR COUGHS Colds, Bronchitis Mathieu's Syrup Still the Favorite

### Under The Evening Lamp

People Used To Study At Home During The Winter

The Port Arthur News-Chronicle says the long winter evening was once a time when people would settle down in their living rooms, and enter on prolonged courses of study. They drew out big leather books from some library or book club, and were determined that the winter should not pass without some added culture. Or they borrowed some of the good old-fashioned 1,000-page novels and set themselves down to novel-reading and the enjoyment of those fascinating but wordy old tales.

To-day people are no longer satisfied to settle down around the fire. Modern life keeps us going so fast that we have forgotten how to say "wisdom." If there isn't something to do almost every night, the people say they can't stand the boredom.

But the long winter evening under the evening lamp produced a quiet mind for next day's work, and people learned many things they needed to know.

### Tribute To Baling Wire

Seems To Be Very Useful In Cases Of Emergency

It's a pity that more attention has not been given to the significance of baling wire. Best sellers have been written about lesser subjects. Without baling wire, how could the farmer have got along so well as he has?

Think of the gates held shut, and the sets of harness fastened together, and all the other emergency repair jobs made possible by a piece of cast-off baling wire. Now is the farmer the only one to profit by this source of material. Automobiles, printing presses, coffee grinders, sewing machines and who knows what else are running this very day just because a length of baling wire was at hand at the opportune time. Some men even hold up their pants with the stuff—Crane, Missouri, Chronicle.

### Plays For Science

Violinists Test Instruments To Determine Tonal Effects

The smallest addition in his career listened to a two-hour violin concert by Jascha Heifetz in the physics department laboratory at Harvard University. Before Professor Frederick Saunders and one assistant, the renowned violinist played for the sake of science. By analysis and recording of sound waves, Prof. Saunders hopes to determine whether new, relatively inexpensive instruments give the same tone as the priceless violins made by the great of centuries ago.

### SELECTED RECIPES

#### CARAMEL CAKE

1 cup sugar  
1/2 cup Crown Brand Corn Syrup  
3/4 cup boiling water  
1/2 cup shortening  
1 teaspoon vanilla  
2 eggs, separated  
2 cups pastry flour  
21/2 cups instant baking powder  
1/2 teaspoon salt  
Method: Melt 1/2 cup sugar in iron frying pan over low heat. When liquid, add Crown Brand Corn Syrup; stir well. Remove from heat; add boiling water; stir well. Dissolve the shortening; add remaining 1/2 cup sugar, vanilla and well-beaten egg yolks. Beat well, and sift the ingredients alternately with caramel syrup. Fold in stiffly beaten egg whites. Pour into pan 8" x 8" which has been lined with wax paper and oiled with Mazola. Bake in moderate oven. While still slightly warm pour over it Caramel Icing.

#### CHERRY CORNSTARCH PUDDING

1 1/2 cups juice from canned red cherries  
3 tablespoons Benson's or Canada Corn Starch  
1/2 cup sugar  
1/2 cup cold cherry juice  
2 tablespoons lemon juice  
Heat cherry juice to boiling in a saucepan. Mix Corn Starch and sugar to a paste with 1/2 cup cold cherry juice; stir into hot juice. Cook over low heat for five minutes, stirring constantly. Add lemon juice; cook for one minute longer. Mould, chill thoroughly. Serve with whipped cream. (Six servings).

During the reign of King Edward III, of England the iron pots and tiring pans doing duty in the royal kitchen were classed as part of the crown jewels.

Luis Prandello, Italian—playwright, once wrote a play which was over 50, and won the \$50,000 Nobel Prize for literature after he had passed 75.

'Near (benevolently): And what is your name, my little man? Email Boy: Well, if that ain't the limit. Why, it was you that christened me.

A Japanese delicacy, served only when favored guests are present, is bee rice, a concoction of wild bees, cooked with rice.

### Drama Festivals

Amateur Theatrical Groups Are Now Rehearsing Plays

Amateur theatrical groups in cities and towns across Canada have started rehearsing plays to be presented at regional festivals preceding the Dominion drama festival in London, Ont., next April.

Festival governors are considering appointment of an adjudicator for the regional competitions but have not yet made a choice. Malcom Morley, English playwright and actor, did the work last year.

Preliminary competitions will start early in January and conclude in mid-March. The season will open in Kentville with the productions from Nova Scotia on Jan. 9 and 10, Prince Edward Island entries will be staged in Charlottetown Jan. 12-13 and the New Brunswick players will hold their festival in Saint John Jan. 16-18.

Dates of western regional festivals have been set for Saskatchewan Feb. 8-11 in Regina; British Columbia, Feb. 15-18 in Victoria, and Alberta, Feb. 22-25 at Edmonton.

Approximately 62,000, or five per cent. of the telephones in Canada are operated by rural co-operative systems, in which there is a total investment of \$19,183,391.

The spoonbill gets its food by wading, and swinging its huge spoon-shaped bill from side to side through the mud and water as it advances.

Insects have blood of various hues; it may be red, green, violet, or colorless.

## Quick Relief for DEEP RASPY COUGHS (DUE TO COLDS)

If that cold has caused throat or bronchial irritation, put a small lump of Vicks VapoRub on your tongue and let it melt. Feel VapoRub's medication bathe the irritated membranes as it slowly trickles down your throat—bringing comforting relief—where you want it—when you want it. Next, melt a spoonful of VapoRub in a bowl of boiling water. Then breathe in the steaming medicated vapors for a few minutes. As these vapors work their way down through the irritated air-passages, they loosen the phlegm and ease the cough. The relief that VapoRub brings will delight you.

### VICKS VAPORUB

#### Time For Check-Up

When you reach the age of 112, says Mrs. Annie Durganian, it's time to watch your health. That's why she was in the county hospital at Chicago for a check-up. Mrs. Durganian was born in Armenia in 1826. "I don't feel bad," she emphasized, "but I thought I ought to see if there is anything wrong with me."

The most disillusioning thing in this world is the realization that most of the people who give you good advice would profit themselves if you took it.

## Buy Christmas Seals

This happy group of young boys are receiving Tuberculin. Those who show infection will be X-rayed.

### HOW THE MONEY IS SPENT...

- 1 In examining children and young adults who have been in contact with a case of tuberculosis.
- 2 In providing ELEVEN CLINICS for the early diagnosis of tuberculosis and for the examining of children and young adults who have been in contact with an active case of tuberculosis. The Clinics are located at PORT QU'APPELLE, SASKATOON and PRINCE ALBERT, Sanatoria, Regina, Moose Jaw, Swift Current, North Battleford, Yorkton, Canora, Melfort and Tisdale.
- 3 In providing travelling clinics to assist physicians in the diagnosis of suspected cases in areas remote from the above stationary clinics.

### RESULTS...

- 4 The tuberculosis death rate in Saskatchewan has been cut in half during the past fifteen years among the white population. In fact, Saskatchewan has the lowest death-rate in the Dominion of Canada.
- 5 Tuberculosis infection among school children has been reduced by 75%.
- 6 Since the preventive programme was commenced in 1926 more than 90,000 persons, nearly all children and young adults, have been examined at the expense of the CHRISTMAS SEAL FUND.

### WILL YOU HELP?...

- 7 Christmas Seals have been sent to nearly forty thousand homes in Saskatchewan and the Christmas Seal Committee is asking your support. If by any chance you have not received the seals, by communicating with Fort Sask, Sask., a supply will immediately go forward to you.
- 8 Send in your gift of Health now so that it can be put to work at once.
- 9 Every stamp or seal put on a letter or parcel tells your friends and all who see it that you are a friend of the suffering and are helping to prevent the sufferings of others.

### OVERHEARD AT THE BRIDGE PARTY....

# United States To Talk Language Dictators Will Understand

New York.—The United States is about to embark upon new international and domestic policies of historic importance, in the opinion of some of the country's most prominent industrial leaders.

As they understand the policy now taking shape, important parts of which are expected to be presented to the congress meeting in January, the United States will hereafter "talk a language the dictators understand," backing up diplomatic and trade policies with vast armaments.

They summarized the scope of the program described as dwarfing by comparison the dreams of totalitarian notions as follows:

- 1.—An army, navy and air force which "could stage off the world."
- 2.—Loans to other American countries for allied defense systems.
- 3.—An international diplomatic drive to block further totalitarian encroachments.
- 4.—Immediate diplomatic and economic rapprochement with all nations in the western hemisphere to forestall further political and trade penetration by aggressive European and Asiatic nations.
- 5.—A swift drive to end unemployment, labor strife and economic troubles within the United States to eliminate the chief argument of totalitarian nations regarding "democracy's failure."
- 6.—Peace between business and government without loss of existing gains of liberal social legislation.
- 7.—A heavy industry stimulation program correlated with necessary rearmament spending in an effort to bring prosperity.

While the full scope of the rearmament program may not become known for months, it now appears early estimates of its size, measured in dollars, although large—a round figure of \$5,000,000,000—more than previously mentioned, is likely to be revised upward, rather than downward.

## Extending Surveys

Ottawa.—Extension next year of nutrition surveys in Canada and inauguration of new investigation work in this field of public health were announced by Hon. C. G. Power, Dominion health minister.

## Record Honey Production

Winnipeg.—Manitoba this year set an all-time record for honey production when 57,000,000 pounds, valued at \$9,000,000, were produced, according to L. T. Floyd, provincial apiarist said.

# Finding New Homes For Jewish Refugees Matter Of Urgency

London.—Prime Minister Chamberlain told the House of Commons the matter of finding new homes for German Jewish refugees was being treated as one of urgency.

He said the problem had been taken up with governors of a number of British colonies, including the governor of Tanganyika, former German East Africa, now a British mandate.

The British government was said by a high authority to have agreed to try to operate a plan whereby the "United States" ambassador, Joseph Kennedy, for removing thousands of Jews from Germany.

The "Kennedy plan" has been described authoritatively as calling for an effort to remove the majority of the 600,000 Jews now in Germany to North and South America, and part of the British, French and Netherlands empires.

Details of the proposals, which are to be presented also to France, the Netherlands, Latin American republics and other states, are expected to be worked out at forthcoming meetings of the inter-governmental committee on refugees, formed last July at Evian-les-Bains.

It was estimated it would cost about \$600 a family to move Jews from Germany to new homes in other lands. The "United States" part in the plan was understood to be mainly financial.

Mr. Kennedy conferred with Malcolm MacDonald, secretary for the dominions and colonies.

It was understood Britain would try to move Jewish refugees considered in immediate danger to British

## No Open Door

Japan To Control All Foreign Trade In China

Tokyo.—Japan denied point by point every charge in a United States note demanding maintenance of the "open door" in China and asserted "ideas and principles of the past" no longer apply in China's "new situation."

This "new situation" results from Japan's aim of an "Asia for Asians" in which she would force China into a solid bloc with Manchukuo and the Japanese empire for the political and economic domination of East Asia.

Observers interpreted the note as an open declaration of Japan's intention to dictate the conditions under which foreign business may continue and foreigners may live hereafter in China.

It was taken as a sweeping statement of policy not only to the United States but to the world generally.

1. A new order, which Japan intends to control entirely, exists in China and pre-war conditions cannot apply.
2. The "open door" will continue only in economic fields of minor importance.

## Declaration Signed

Which Brings Into Effect Pact Between Britain And Italy

Rome.—Recognition by England of Italy's conquest of Ethiopia took place when the Earl of Perth, British ambassador, presented his credentials to Foreign Minister Galazzo Ciano.

Lt. Gen. Lord Perth and Count Ciano signed a declaration bringing into effect the Anglo-Italian pact signed April 16.

The pact involved withdrawal of troops from Spain and Llyn, adherence to the 1936 London naval treaty, assurance that Italy had no aspirations in Spain, re-affirmation of guarantees respecting Lake Tana, the source of the Nile river, abandonment of all claims to influence in Arabian territories and extension of British trading facilities to Ethiopia.

## Australia's Wheat Crop

Melbourne, Australia.—Plagues of insects and drought were said to have resulted in a 75 per cent. reduction in Victoria's estimated wheat crop of 12,000,000 bushels. Caterpillars, grasshoppers and other insects are ravaging crops throughout the state.

## Earl De La Warr

Who succeeds Earl Stanhope as President of the Board of Education in the British Cabinet.

## Prison Reform

Britain To Abolish The Flogging Of Criminals

London.—Flogging of criminals will be abolished, except for serious offences committed within prison walls, under the terms of the government's bill issued recently.

Mutiny, incitement to mutiny and gross personal violence to a prison official will be the only crimes for which flogging may be ordered.

The measure, called the criminal justice bill, does away with hard labor and wipes out the term "penitentiary."

Of particular importance in the bill were measures modifying the treatment of the young offender.

"Juvenile" compulsory attendance centres will be established in the large cities where children between 12 and 17 will be required to attend in spare time as punishment for minor offences.

Offenders between the ages of 17 and 23 will be sent to special reformatory centres instead of prison when recommended in custody or committed for trial.

Hostels will be established for youths of 16 to 21 guilty of non-serious offences. At these places disciplinary conditions will be imposed but the occupants will be permitted to continue their regular jobs.

Habitual criminals will be divided into two categories, under 30 and over that age.

The courts will be empowered to impose corrective training on the younger classification and preventive detention on the older persons instead of imprisonment.

The term "state mental patient" will be substituted for "criminal lunatic." The terms "hard labor" and "penal servitude" will be abolished.

The House of Commons also expressed approval of an experimental abolition of the death penalty for crimes of violence.

It carried, by a vote of 114 to 89, a motion by Vyvyan Adams, Conservative, proposing abolition for a five-year period in peace time.

## West Making More Cheese

Only Half Usual Quantity Shipped From East This Year

Stratford, Ont.—Eastern cheese makers shipped only half as much cheese to western Canada this year as last, the Cheesemakers' Association of western Ontario was told by C. E. Lackner, director of dairying in the provincial agricultural department.

"It won't be long before the west will be shipping cheese to eastern Canada," Mr. Lackner declared. "British Columbia manufactured 168 per cent. more cheese this year than last year."

## Order For Large Bombers

Signed Between British Government And Canadian Aircraft Manufacturers

London.—Sir Kingsley Wood, secretary for air, announced in the House of Commons an agreement had been signed between the government and Canadian aircraft manufacturers for an initial United Kingdom order for large bombers.

The air minister said the Canadian aircraft firms concerned undertook to maintain during the next ten years manufacturing capacity available for further potential orders of a smaller character if required.

Sir Kingsley said the type of machine to be constructed would be the Hampden and that the agreement represented a considerable development of Canadian manufacturing capacity in preparation for large production of aircraft of a still more advanced type.

The minister said an associate company will control the whole scheme and provide two central establishments, at Montreal and Toronto.

In addition to arrangements for the "gross" manufacture of large bombers, negotiations are now proceeding in London with two Canadian companies for the manufacture of fighter and general reconnaissance type at Fort William and Vancouver, respectively.

The aircraft orders are due for delivery during 1940. Although it would not be in the public interest to disclose numbers, the orders represent a very considerable development in Canadian manufacturing capacity in preparation for a large production program which will call for aircraft of a still more advanced type and running parallel with the later stages of the initial order.

## Trans-Canada Service

Air Lines Are Opening Up A Wide Field For Youth

Ottawa.—A wide field for youth had opened up by the development of Trans-Canada Air Lines, Hon. C. D. Howe, transport minister, told a meeting of Liberal women. There are 30 persons under 25 years of age trained in the service and many others undergoing a thorough course in ground work, instrument flying and mechanics.

"Our record has been clear of accidents or errors since operations began the middle of September and there has only been one cancellation on account of weather," he said. "We are making absolutely sure every precaution is being taken."

## Public Health

Nutrition Survey To Be Extended Next Year

Ottawa.—Extension next year of nutrition surveys in Canada and inauguration of new investigation work in this field of public health were announced by Hon. C. G. Power, Dominion health minister.

In Alberta a study of 100 families, on a budgetary basis, has been completed. Arrangements are being made for a survey to be carried out on the actual consumption of food by members of Toronto schools families. The survey will be conducted by the University of Alberta.

## Some Caretakers Well Paid

Toronto.—Officials at the Toronto school administration building made public figures showing some caretakers of Toronto schools have a net income higher than the salary at which high school principals start. One caretaker receives \$3,857, compared with the \$3,800 at which principals start.

## H.M.S. REFULSE IN PORTSMOUTH HARBOUR

Their Majesties King George and Queen Elizabeth will make their journey to Canada, next May, in this warship.

# British Elections Show Swing Against Chamberlain Policy

London.—The foreign policy of Prime Minister Chamberlain's government received another setback when the Conservative candidate lost Bridgewater in a by-election.

Running as an Independent Progressive, Vernon Bartlett, London newspaperman and former radio commentator on foreign affairs, won the traditionally Tory seat by 2,322 votes. In the last election this southern rural riding returned the Conservative candidate, R. P. Croom-Johnson, whose elevation to the bench created a vacancy in the House of Commons, by a majority of 5,569 over his nearest rival in a thirty-party contest.

The vote was: Bartlett, 19,540; Patrick Heathcoat-Amory, Conservative, 17,208. In 1935 the count stood: Croom-Johnson, 17,939; N. D. Blake, Liberal, 7,370; A. W. Lovesy, Labor, 6,240.

Since the Munich settlement of the Czech-German dispute the government has lost two seats at by-elections, Dorford and Bridgewater, and in all others the Conservative voting strength has been reduced.

Mr. Bartlett, 41, made his fight on foreign policy, particularly attacking Mr. Chamberlain for "surrendering" to the dictators. His opponent had the full strength of the Conservative machine behind him.

It is becoming increasingly clear the German anti-Jew drive has had an unfavorable effect on the Chamberlain government. Many people in this country, long heralded as a model for tolerance and democratic rule, would now how it is possible for Great Britain and Germany to become friendly while Germany pursues its present racial policies and its leaders and press indulge in diatribes against everything democratic.

"This is quite definitely a defeat

for the Chamberlain policy and a victory for the Eden policy," said Mr. Bartlett.

More than 84 per cent. of the total Bridgewater electorate turned out to vote. It was believed a record poll for any by-election since 1923.

The successful candidate was mobbed by enthusiastic supporters when he left his headquarters.

Members of Mr. Bartlett's party said they had found particularly in the rural areas, strong resentment among the younger people to the inflammatory speeches delivered by the Nazis against Britain. An opinion frequently expressed, they said, was "We are not going to be told what to do by foreigners."

Mr. Heathcoat-Amory, defeated candidate, said, "It just goes to show how short is the memory of the electors," apparently in reference to the sample Munich policy that the prime minister on his return from Munich.

## Winner At Winter Fair

Nels Linden Of Alberta Is Wheat King For 1938

Toronto.—Nels Linden, of Wetaskiwin, Alta., was named wheat king of the Royal Winter Fair, his sample of Reward variety winning over more than 130 exhibits.

The new wheat king, who succeeds James S. Bastian of Wembley, Alta., 1937 winner, farms 1,000 acres near Wetaskiwin, producing prize grain for many years. Seldom has a grain with Reward, the hard Red Spring variety, adjudged best at many shows.

Reserve title was taken by Cecil Trowell, of Saltcoats, Sask., with a sample of Minkler. Saskatchewan results in hard red spring wheat placed George Avery of Kelso, seventh with Bonown.

# New Trade Agreement Signed In Washington Will Widen Markets

Ottawa.—A broadened and smoother highway for Canadian products moving into the United States market was opened, but at the cost of the Dominion's wheat preference in the United Kingdom and a lessening of other preferences, including that on apples, in favor of the United States.

This was revealed when details of the new Canada-United States trade agreement, signed in Washington, were made public in Ottawa, accompanied by an explanation of Canada's part in the Anglo-American trade agreement, signed at the same time.

Canadian concessions to the United States were also on a broad line, lowering or preserving the rates on some 447 items in the tariff structure and promising early removal of the three per cent. excise tax on duty paid value of United States imports.

Britain summarized Canada gave the United States the following concessions:

Reductions in duty on 283 items in the Canadian tariff, including a wide range of agricultural, fisheries and forests products, tobacco and spirits, chemicals and paints, earthenware, glassware, metals and their products, electrical apparatus, motors and motorcycles but not automobiles, air-

craft, precision tools, heavy construction and mining equipment, household appliances, farm and fishing implements and equipment, textile and leather products and rubber tires.

In addition 146 items in the tariff are bound or "frozen" at their present rates for the duration of the agreement.

Reduction in duty on 129 items in the United States tariff and a bound or "frozen" level for the duration of the agreement on 73 additional items. Maximum reductions or less are given on all fish, fresh and salt-water, potatoes, lumber and shingles, cattle, dairy products, hog products, horses, clover and grass seeds, turpentine, silver fox skins, blueberries, poultry products, pulp and paper products, metals, non-metallic minerals, ferro-alloys, whisky, acetate acid and a wide range of manufactured goods.

Virtually every kind of fish caught in Canada will enter United States at a lowered duty rate, in many instances the reduction amounting to the maximum of 50 per cent. below the 1930 rate which is the limit President Roosevelt is empowered by congress to lower tariffs.

Livestock quotas were increased, potatoes given the maximum tariff reductions either for table or seed use, with seasonal provisions and quotas, and the maximum reduction effected on fish or chilled pork with lesser reductions on bacon and other hog products.

The new agreement superseded that which was concluded Nov. 15, 1925. All concessions obtained in the 1935 agreement were retained and a much greater number of new concessions added.

To facilitate negotiation of the Anglo-American agreement Canada, in common with other members of the British commonwealth, sacrificed certain preferences on the United Kingdom market.

The preference of six cents a bushel on wheat was removed, so far as the United States was concerned. The preference of four and a half shillings a hundredweight on new apples was reduced to three shillings covering the period Aug. 16 to April 15, and the same applies to pears.

Preferences were also lowered on preserved apples, honey, timber, chilled or frozen salmon and patent leather.

## Legal Notices

### NOTICE TO CREDITORS AND CLAIMANTS

IN THE ESTATE OF WILLIAM BELL, late of Coleman, in the Province of Alberta, hotel proprietor, deceased.

NOTICE is hereby given that all persons having claims upon the estate of the above named William Bell and William Bell carrying on business as Grand Union Hotel, Coleman, who died on the 29th day of October, 1938, are required to file with the undersigned by the 6th day of January, 1939, a full statement of their claims duly verified and of any securities held by them and that after that date the Executrix will distribute the assets of the estate among the parties entitled thereto, having regard only to the claims of which notice has been filed or which have been brought to her knowledge.

DATED this 16th day of November, 1938.

R. F. BARNES,  
Barrister, etc., Coleman, Alberta,  
Solicitor for the Executrix.

### APPLICATION FOR BEER LICENSE

PUBLIC NOTICE is hereby given that the undersigned intends to apply to the Alberta Liquor Control Board for a license to sell Beer by the glass or open bottle for consumption on the licensed portion of the premises, and also to sell Beer by the unopened bottle for consumption elsewhere than upon the licensed premises, in conformity with the provisions of The Government Liquor Control Act of Alberta and the Regulations made thereunder, with respect to the following described premises:

"Situated in the west half on the ground floor of the Grand Union Hotel, Coleman, Lots Three (3), Four (4), Five (5) and part of Six (6), also Lot Fifteen (15) in Block Twelve (12), Plan 820-L, Coleman."

DATED at Calgary this 16th day of November, 1938.  
SYLVAN LAKE HOTEL  
COMPANY, LIMITED.

**That Choked Feeling**  
For her birthday, little Pat had been given a ring, but, much to her disappointment, not one of the guests at tea noticed it. At last she could bear their indifference no longer. "Oh, dear," she exclaimed, "I'm so worn in my new ring!"—Furrow.

## Ladies Show Interest In Curling League

Interest in the formation of a ladies curling league has reached far beyond the fondest expectations of its sponsors. Originally it had been hoped to secure sufficient names to form four rinks, but so much interest has been shown by the ladies that five or more rinks is a probability.

The fee is \$4 and is undoubtedly the cheapest sport any Coleman woman will enjoy this winter. A meeting of the men's club will be held on Sunday and plans made to accommodate the ladies certain nights of the week.

### AMATEUR CONCERT

December 1 and 2  
Amateur talent in entertainment throughout the Crow's Nest Pass will be brought to Coleman on Dec. 1 and 2. A local organization is promoting the contest in an effort to keep to the fore the high standard of talent possessed by Pass artists. The contest will be divided into various divisions such as vocal, instrumental, dancing, comedy, etc. Entries must be sent to Box 65, Coleman. First and second prizes valued at \$3 and \$1.50 will be given in each class. The contest will be held in the Community hall.

SOCIETY PRINTING, of the finest quality, on good quality stock, correctly styled and superior finish. Invitations, announcements, and all forms of society printing, at The Journal office.

## Special Bus---Elks on Outing

Coleman Elks, about 25 of them. lusty and strong, went by special bus to a district meeting at Macleod on Tuesday evening, when in addition to that town, Granum lodge came down to join with the other lodges. The patrol team from Granum initiated several candidates. The evening concluded with the usual jovial gathering characteristic of the Elks, and—"a good time was had by all."

### Alex. McDowell Now At Manston, Kent

Alex. McDowell, youngest son of Sam McDowell, of the Alberta Government Telephones, Blairmore, is at present stationed at Manston, Kent, Eng., in the Royal Air Force. He is a pilot-officer, and has been over there for 20 months. Born in Crossfield, Alta., 23 years ago, he lived in this province up until the time of joining the R. A. F. One of his recent test flights was in Scotland, by daylight, and returning at midnight to his home base at Manston.

### Hockey Association Issues League Charts

A chart, 17" x 24", containing the complete Alberta senior league hockey schedule was distributed by secretary Fred Guerard throughout a number of business places in town last week.

The chart is ruled in sections showing the home and away games of each team and with columns for marking in the scores and points. At the end of the season the goals, for and against, can be easily tabulated to show how a club made out in the goal averages. All home games are printed in red and away games in black. Another column is complete with the dates when games are scheduled.

If any readers of The Journal have an issue of Sept. 29, it would be greatly appreciated if they would return to this office.

## Ladies Bowling League Creates Interest

Twenty young women, forming four teams, are seen frequently on the Grand Union bowling alleys busily engaged in league warfare. At the present time the "Easy Markers," captained by Mary Rypien, are out in front with ten wins and two losses. Captains Jean Fields and Margaret Bell are tied in second place with seven wins and five losses, while Maisie Gillespie with three first year members on her team has yet to win her first league game in twelve starts.

Joe Urbanik is leading in ten pins, having a score of 286, for the handsome reading lamp which will be given as a prize for the player having the best score from Oct. 15 to Christmas. Jean Fields leads the pack in five pins with a score of 347. Nice goin' Jean!

### Rialto Pool Room Sponsors Christmas Tournament

Entries are being secured at Rialto Pool room for the annual Christmas tournament which is expected to get under way the first week in December.

Approximately thirty entries have been secured in each of the events, billiards and snooker, and many more are expected during the next few days. Jack Hopkins is the handicapper and manager of the tournaments.

### Car Accident Sunday Morning

A car accident occurred on the Blairmore road on Sunday at 1.40 a.m., when the left rear wheel of a 1929 Oldsmobile, driven by Miss Peggy Jones of Passburg, came off the car. The car turned completely over coming to rest on its top. Little damage was done, there being no glass broken or fenders bent. The four occupants of the car were uninjured and reported the accident to Constable Antle.

### LOCAL AND GENERAL

The dairy, owned and operated for many years by Mrs. Gudmundson, of Grafton, will be sold to Mr. Peter W. DeGroot, of Pincher Creek.

The Rangers held a miscellaneous shower at the home of Miss Kathleen Milley on Saturday afternoon in honor of Mrs. Joe Spievak, recent bride.

Two fine registered Ayrshire cows have been added to the herd of Coleman Dairy, owned by Joe Fauville, making 17 in the herd. These cows were purchased from a well-known stock farm in Lethbridge district. Joe states next year he will likely be purchasing at the Calgary live-stock and cattle show.

### MERCHANTS:

Why patronize out-of-town printing firms? Do they patronize you? A dollar spent with the local printing firm eventually returns to your cash register. Outside printing peddlers—and not forgetting peddlers intermingling with local merchants lines of business—make many misleading statements that eventually make YOU the loser.

## LINGERIE de Luxe

## WORLD HAPPENINGS BRIEFLY TOLD

Plans for establishment of new industries in New Zealand are being studied by the cabinet, Prime Minister Michael Savage announced.

A gadget for measuring heads and a lock that cannot be picked or "jimmied" were two of the inventions exhibited at the International Police Congress at Toronto. The pick-proof lock was invented by a policeman.

The last contingent of British troops attached to the port of Cork have left Irish soil for England, completing evacuation under the terms of the Anglo-Irish accord.

Two of the world's most expensive dolls, attired in the best French can do, were presented by the French republic to Princess Elizabeth and Margaret.

Among other things there will be provision for skating, boxing, swimming and dancing at a stadium with accommodation for 15,000 to be built at Birmingham, Eng., next year.

Three Swiss newspapers were banned as mouthpieces of three Fascist-inclined political groups whose headquarters previously had been raised.

The British Columbia government is planning introduction of legislation to establish credit unions in the province similar to those operating in Nova Scotia and Quebec.

A missing symphony, known to have been composed by Haydn in 1770, has been discovered in the music library of Edinburgh University by Dr. Hans Gal, Austrian composer.

### Thatcher Wheat Passes Tests

British Cereal Chemists Have Found It Satisfactory

British cereal chemists have given Thatcher wheat exhaustive tests and found it satisfactory. C. M. Hamilton, of the Canadian board of grain commissioners and a former cabinet minister in the Saskatchewan government, said after his return from a trip intended to introduce the rust-resistant wheat to the British market.

"It is not a very good looking wheat, because it is dull in color," he said. "We have always believed a wheat should not only be good but look good as well." Because of the dull look of the variety a trip to England had been deemed advisable to acquaint chemists, millers and importers with its virtues.

Turning to a discussion of wheat taint, Mr. Hamilton remarked there had been complaints in Britain about taint in Canadian wheat.

"Harbor authorities on the Pacific as well as the Atlantic might well look to see that grain that is not stored in the same holds with lumber and apples. That's a matter for the port wardens or whoever watches cargo storage."

### A Japanese Gateway

Bias Bay Was For Many Years A Pirate's Hideout

There may be something significant in the fact that it was through Bias Bay that Japan recently moved 40,000 troops toward Canton. There may be something even more significant in the fact that the bay was for many years a pirate's hideout—really much more a stronghold than a hideout, for once they had entered it the robbers of the sea counted themselves safe among its many islands.

Besides a refuge, the bay was a cleanup spot, into which captured steamers were sailed to be looted. In sailing days it was possible for the pirates to handle their victims on the high seas, and for a time steam caused much technological unemployment among residents of Bias Bay. But for a time only, for as usual, the effect on labor was offset by another invention. The pirates learned to board their victims as passengers, overboard the crews at the right moment and take the ships into the bay, after which the men, as often as not, never were heard of again.

There is no doubt about the quiet life being the most healthful. Sensations are transmitted along one's nerves at the speed of about 100 feet per second.

Bones of a giant horse and dwarf buffalo were discovered in South African caves by scientists seeking further trace of man's purported ape-like features.

More bricks are contained in the Great Wall of China than in all the buildings in Great Britain.

Japan's population is increasing at the rate of 2,000 a year.

### Awards For The West

Saskatchewan Farmers Make Clean Sweep In Alfalfa Class

The romance in relation of man to farm crops was exemplified again at the Royal Winter fair in Toronto with announcement four farmers from White Fox, Sask., had received first, second, third and fourth prizes in alfalfa, Grimm variety.

Six years ago settlers in that northern Saskatchewan district were all on relief. The climate was too rigorous and the soil too poor for ordinary crops to flourish. To-day not one alfalfa grower near White Fox is on relief and many are comparatively well off.

It's all due to alfalfa. The Dominion government experimental farm found the ground in that area, known as the grey soil district, particularly suited for growing the crop and introduced the Grimm variety.

By 1935 settlers marketed 40,000 pounds. In 1935, 160,000 pounds were harvested. The year 1937 saw 500,000 pounds produced and this year, a record-breaker, 2,000,000 pounds of Grimm alfalfa came off previous year's productive ground. One million pounds of the 1938 crop is going to Germany and a large part of the remainder to the United States.

The winners at the fair, all from White Fox, were: 1. A. E. Ruck; 2. H. A. Myers; 3. G. R. McLean and 4. David S. Owen.

Dominion government experimental farm officials, in co-operation with University of Saskatchewan, developed the Grimm variety, and say the reason for this unprecedented expansion lies in the hardy qualities of the seed crop.

Western Canada took the bulk of prize awards in creamery butter, 20 one-pound prints, in dairy products judging at the fair.

Alberta and Manitoba were tied in the first prize section, taking three each. Manitoba led Alberta in the second group, 13-12, and was in front in third prize placings, winning 20 to Alberta's 13.

Burns and Company, Limited, representing various Alberta towns, were out in front in all three classes, winning one first, six seconds and five thirds.

Western competitors fared well in the event of four-horse draught team of geldings or mares. Allen C. Leslie, of Watrous, Sask., took second prize and L. O. Crockett, of Mayerthorpe, Alta., fourth.

### AN EVER-SO-CHIC BOLEERO FROCK

By Anne Adams

Here's a campus queen who rates highest honors in her fashion course—for this very new boleo-frock she has made is an Anne Adams creation! That high neckline and "wrap-around" effect is the answer to "What's different in dress styles this fall." The boleo of Pattern 4952 is equally smart, and may be long sleeved for brisk days, or short sleeved to show off dimpled elbows. (Matching or contrasting it will complement other frocks as well.) Pick a light weight Fall wool in bright blended colors. You'll stich up your all-occasion triumph of a frock in no time, and be full of praise for the helpful Sewing Guide sheet of this pattern!

Pattern 4952 is available in junior and misses' sizes 10, 12, 14, 16 and 18. Size 14, entire ensemble, takes 3 1/2 yards 54 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

### WOOD CARVERS OF QUEBEC

The Bourgault brothers of St. Jean Port Joie, Que., started eight years ago to carve small wood statues depicting phases in the life of the habitants. They created such a demand for their clever work that the numerous little figures are now shipped all over the continent. The five brothers are shown in the top photograph; below is shown Melvin Bourgault with one of his masterpieces, called "Le Defricheur" (Land Clearer). This piece was carved from a single block of wood, the only tools used, being a small pen-knife and a chisel.

### Letter From Neville Chamberlain

President Of Federated Women's Institute Is Thanked For Support In Crisis

Mrs. H. McGregor, president of the Federated Women's Institutes of Canada, has received a letter of thanks from Prime Minister Neville Chamberlain for a cable sent to him by her organization during the recent European crisis.

The cable said the Federation "heartily endorse your efforts for peace, having faith in their ultimate success."

Mr. Chamberlain replied: "Please accept my warm thanks for your kind message. During these difficult and anxious times, through which we have been passing, the expressions of sympathy and goodwill, which I have received from all quarters have been a source of great strength to me."

The Federated Women's Institutes represent about 72,000 women, the membership drawn principally from rural areas in every part of the Dominion.

### Cutworm Control

Lethbridge Entomologist Is Awarded Medal For His Excellent Work

For discovery last year of a means to control the pale western cutworm, a wheat pest, Harold L. Scamman, Lethbridge entomologist, has been awarded the 1938 medal of the Professional Institute of the Civil Service. J. C. Beauchamp, Institute president, announced. The award is made annually for meritorious public service by a civil servant.

"The particular service rendered by Mr. Scamman and his associates at the Dominion department of agriculture's entomological laboratory at Lethbridge, of which he is the head, is regarded as probably the most important contribution to entomology in years and should reflect a benefit of millions of dollars to our farmers and therefore the public generally. If they take advantage of the Lethbridge laboratory method."

An average-size whale will supply about ten tons of oil fit for kerosene and other purposes, and 70 tons of by-products from the flesh and bones.

### Fish Out Of Water

Old Specimen Reaches London Zoo From Africa

A unique example of "fish out of water" was provided during the week by the arrival at the Zoo aquarium of some African Lungfish. The fish arrived incased in solid blocks of African mud.

Lungfish have the swim bladder converted into a breathing organ, by means of which the fish can tide over long periods of drought.

As the dry season approaches, the fish burrows into the river bed, where it constructs a mucous-lined cell connected with the upper air by a narrow breathing tube.

Here it is immune from the sun's heat, often over a period of several months.

Lungfish are collected for the Zoo by the simple expedient of digging them up in their caudal cells and sending the so-obtained foot-square solid blocks of Africa direct to London. The fish are eventually liberated with the aid of a chisel and hammer. London Observer.

### New Wealth

Importance Of Mining's Contribution To The Welfare Of Canada

New wealth produced by Canada's mines has "probably" been the most important single factor in maintaining the national credit, George C. Bateman told the Canadian Institute of Mining and Metallurgy at Vancouver. Secretary of the Ontario Mining Association, Mr. Bateman felt too little consideration was given to the importance of mining's contribution to the welfare of the country as a whole.

The tendency was to emphasize production records, statistics and news of interest to speculators. Wage bills and purchase of supplies were just as important.

In England books and rare manuscripts belonging to a man who died in 1872 still are being disposed of, and the sale is estimated to last another 30 or 40 years.

The light sometimes appearing on the assets and spars of ships, known as "St. Elmo's fire," is caused by a slow discharge of electricity.

"Just you wait there, dearie, an' I'll run an' git a doctor!" —From The Bulletin, Sydney, Australia.

### SUNDAY SCHOOL LESSON

NOVEMBER 27

#### HONESTY IN ALL THINGS

Golden text: Thou shalt not steal. Exodus 20:15.

Lesson: Exodus 20:15; Matthew 19:16-22; Luke 19:1-10, 45, 46; 20: 8-16.

Devotional reading: Psalm 111.

#### Explanations and Comments

The Eighth Commandment: the Law of Honesty, Exodus 20:15. Thou shalt not steal.

How Zaccheus Learned Honesty, Luke 19:1-10. This story of what happened one day when Jesus was passing through Jericho, is a very familiar one. Zaccheus, a tax-gatherer, was eager to see Jesus. Being short of stature he climbed a sycamore tree by the side of the road where Jesus was to pass. This was not the English sycamore, but a tree that has been described as a fig-mulberry, having fruit resembling figs and leaves resembling those of the mulberry. It has a short trunk and low, wide-spreading branches. Jesus looked up and saw Zaccheus and called him by name. No Jewish rabbi would have offered to stay at a tax-gatherer's house, but Jesus said: "Make haste and come down for to-day I must abide at thy house." Jesus' conversion was like that of a shepherd in regard to a lost sheep.

The conversation which took place between Jesus and the publican is not recorded, but Jesus thought him worthy he would make himself worthy. He became a new man with a new purpose. He committed himself completely to Jesus and his way of life. "Here and now, Master, he said (in Weymouth's translation), 'I give half my property to the poor; and if I have unjustly exacted money from any man, I pledge myself to repay him four times the amount.'"

Honesty in the Temple, Luke 19:45, 46. In the temple precincts animals were sold for sacrifices and money was changed for offerings. This temple market arose for the benefit of the pilgrims from afar who needed to secure for sacrifices beasts and birds duly certified as pure and free from blemish.

Jesus entered the temple and began to denounce them who sold, saying unto them, "It is written, And my house shall be a house of prayer: but ye have made it a den of robbers." In King Lear, when the Earl of Kent desires to attach himself to his son, Gloucester, and thus gives as his reason, "You have to that in your face that I would fain call master authority."

This face was the face of Jesus and the traffickers before him.

World Peace Their Aim

Boy Scouts Making Preparations For Two World Gatherings

World peace is still the aim of the Boy Scout Movement, and British Scouts are making preparations for two big world peace gatherings—in Australia and one in Scotland. Both are to be attended by boys and young men from all parts of the globe.

First of the assemblies will be the Australian jamboree near Sydney in December. Some 10,000 boys are expected to participate, and Britain's contingent is sailing on November 2, under the leadership of Rear-Admiral R. Collins, C.B.

Later will come the World Rover Scout Meet in the grounds of Monzie Castle, near Crieff, Perthshire. An attendance of 8,000 is expected—and the password will be "Friendship."

#### Would Not Solve Problem

Conscripting The Rich Does Not Put People To Work

Conscripting the rich in a campaign for increasing the turnover of tax banks and treasury notes obviously cannot possibly solve the problem of putting men to work and of increasing the standard of living among our working classes. The problem of production, distribution and consumption may be gravely concerned with the effects of commercial rivalry and unbridled competition, and control along those lines seems to be indicated, but it is not concerned with private fortunes and how they are used. The slogan of "soak-the-rich" is used all too often to divert attention from the real issues of social and economic reconstruction.—Halifax Chronicle.

Old Salt (to visitor, who has been out several times with him in his boat): "Bit of a swell to-day, sir."

Visitor: "Nice of you to say so—how you ought to see me on Sundays."

Secretly married teachers, in Medford, Mass., lose their positions the moment their marriage is discovered, and are required to return all salary received since the marriage.

Old legends tell of men who had the power to look down into the earth and see where gold and silver lay hidden.

No spot in the British Isles is situated more than 80 miles from the sea.

One of the few western countries where men live longer than women is Sweden.

**Health LEAGUE OF CANADA**  
presents  
**TOPICS OF VITAL INTEREST**  
by **DR. J. W. S. McCULLOUGH**  
TO LIVE LONG, EAT WISELY

For old people, hard-boiled eggs are about as digestible as clay pigeons. So says Dr. C. F. Martin in his article in the last issue of "Health" how to attain a normal old age. Periodic health examinations and prevention of illness are his double recipe and he cites a list of the principal factors in living long and comfortably. To live we must take certain steps—to live long we must eat wisely.

Dr. Martin says "old people cannot stand the gastronomic feasts of youth. The average man eats twice as much as he needs—and, like a cat, slowly—chews each mouthful in moderation. If he avoids the rich gradients of reputation and the sharp corners of hyper-acidity—the octogenarian can "gang his ain gut."

It is quantity that does most harm. "With age, bodily growth has ceased, the furnace needs less fuel—so the diet must be reduced. We can easily tell that in various ways. This prescient obesity, which is so common, is merely the result of neglect of preventive medicine. We must avoid growing fatter as we get on in years. The human stove wears out from the too great fuel load for millions of extra fat cells."

But it is all very well to advise on diet, which is only care of the when one can supplement it with character, self-control restraint and moderation.

"A sorry fare, free from care, is perhaps a dull life, and one is apt to get irascible and lipped on the subject of diet."

And so I am not going to tell you in detail what kind of diet you should take. You know already that meats are for the young, and starches for the old; that fruits and vegetables are for the young, and starches for the old; that old-age food; that milk, preferably pasteurized, has all the elements needed; that cream cheese is better than butter; and that butter, buttermilk and junket are useful.

The art of living, this eminent Montreal doctor says, is not a preparation for dying, but a proportioning of work and leisure, of labor and recreation; of eating, drinking and making merry that man need not die tomorrow. And so prevention is the order of the day.

Editorial Note: Readers desiring to complete a set of Book of the Health League of Canada, 165 Bond St., Toronto, Ont.

### Not Worth The Effort

Fisherman's Catch Brought Less Than He Paid For Bait

Captain Angus Tanner of Lunenburg said his schooner into Halifax, her holds filled with ice fish the finest cod and haddock the Atlantic produces, 225,000 pounds of it. He received less than 100,000 for these fish, but he was so sure of a control of eating, drinking and making merry that man need not die tomorrow. And so prevention is the order of the day.

By the time Captain Tanner's fish had been sold, through a retailer a few blocks from the waterfront, the cost of the cod had mounted to two pounds for 25 cents, and of the haddock for which he was paid a cent and three-quarters, to the same figure.

### Etiquette Of Middle Ages

According to an etiquette manual of the Middle Ages, you should never lift a piece of meat out of the gravy dish with your whole hand, but should delicately fish it out with three fingers, and in so doing, never immerse your fingers in the gravy farther than the last joint.

It was dusk as he stopped at the roadside garage. "I want a quart of red oil," she said.

The man gaped and hesitated, "R-r-red oil, madam?"

"Certainly," she said. "My tail light has gone out."

## CHAPTER VIII.—Continued

Jack was tempted to ask him if he had seen McKenzie Joe. But the very detachment of the man, the look of exquisite agony with which he watched the trepidation of the little ivory ball, clicking against the interstices, bounding out, hesitating, then rolling on again before it should finally sink into its final socket, withheld him. He turned away, while from behind him the call of the croupier blended with the queer, racking voice of Kenning, pleading his joy as he clawed for his chips. Jack went on, at last to corner the wandering Florine.

"Listen!" he commanded. "Have you seen that partner of mine?"

"Baby," she exclaimed. "I ain't stolen him."

"I didn't say you stole him. I asked if you'd seen him. You helped him out with some liquor, didn't you?"

"Only five crocks," said Florine innocently.

"Only five?" asked Jack, with his hand to his forehead. "Which way did he go?"

Florine pointed to the entire North. Hammond hurried out the door, murmuring to himself.

"No need trying to find him. He's caching it somewhere—for later. And he always remembers where he puts it."

After a time, he returned to the pavilion. There was nothing to do but wait and watch. The dance hall had become steamy, the clatter from the bar louder, the music of the orchestra more raucous. Jack Hammond wandered endlessly, watching every entrance. An hour passed. Then the younger partner shot forward. McKenzie Joe had appeared in a doorway, his hat crosswise on his head, his sleeves rolled back, and his electric blue suit grimy from contact with the forest. Jack knew the story, a wandering course to some point, deep in the bush, where McKenzie Joe had buried that liquor—again Jack reminded himself that no matter how much more liquid might flow down this beaverlike man's throat, Joe would be able to go to that supply like a hound dog to a flock of quail. Nevertheless, Jack went forward in a desperate attempt at a ruse.

## TAKE THE LEAD OUT OF YOUR LEGS

Get Oxygen in Your Blood and You'll Get the Pop that Sends You Bounding Up the Stairs

People who suffer to die because oxygen has been completely cut off from them. Just as surely you are slowly smothering if your blood lacks oxygen. They carry the oxygen you breathe in to every part of your system. Without enough oxygen, your arteries, veins, kidneys, liver, stomach and bowels slow down. Your skin gets pale, flabby, often itchy. Your nerves may become jittery—your life quickly faded.

What you need is Dr. Williams' Pink Pills. These world-famous pills help make more and better red corpuscles and thus increase the oxygen-carrying power of your blood. Get Dr. Williams' Pink Pills today at your drugstore. See for yourself how this time-tested blood-builder will help you get back your pep. One little box of Dr. Williams' Pink Pills.

"Well, Joe," he announced with simulated gusto, "I've been waiting for you. Where have you been?"

McKenzie Joe looked at him with mackerel eyes.

"Go lay an egg," he said succinctly, but still with that inscrutable smile. There was no thickness to the voice, no silliness to the tongue—only a suggestion of monotonous indifference. Then, disengaging his partner entirely, he attempted to walk through him to the next room.

Jack stepped aside. At this point in Joe's progress of incineration, it was best to humor him. Hammond even allowed him to plod to the bar, where methodically he ordered drinks for the house.

Solemnly, but still with that polar-bear smile, McKenzie Joe watched his guests inhale. Then he signalled the bartender to get the glasses remain on the bar, while, to the whooping encouragement of his watchers, he smashed them, one after another, upon the floor, bowing meanwhile to the applause.

Jack's heart went steadily downward. The next step would be for McKenzie Joe to pick a fight. It never failed.

The noise caused celebrants to assemble from every part of the rambling structure; it even halted the play in the gaming rooms, the players crowding in the doorway. It was just as they began to flood through that McKenzie Joe turned from the bar and his smile vanished.

A queer gleam came into his hitherto vacant eyes. His fingers widened until they were muscular half arcs. His tremendous shoulders hunched and his round, beaverlike head shot forward. Jack had been cut off by the sudden surge of the gaming room crowd. Desperately he attempted to break through.

"Joe!" he shouted. "Joe! Watch yourself!"

But McKenzie Joe pretended not to hear. The crowd fell back, suddenly silent, leaving in their wake a solitary man, hypnotized by fear, his hands gesturing futilely, a set, terror-stricken smile on his gray lips. It was Bruce Kenning.

"Joe!" he shouted. "Joe! Watch yourself!"

But McKenzie Joe pretended not to hear. The crowd fell back, suddenly silent, leaving in their wake a solitary man, hypnotized by fear, his hands gesturing futilely, a set, terror-stricken smile on his gray lips. It was Bruce Kenning.

"Well, Joe," he said jerkily, "having a good time, eh, Joe?"

"Let me through here!" Hammond shouted. "You fools—let me through! Somebody stop McKenzie. Do you want a man killed?"

"Key out of this!" she shouted and swung a blackjack. The man fell. Instantly a roar sounded from a dozen equally drunken pals; all in an instant, Hammond found himself surrounded by milling forms armed with wildly flailing fists of a free-for-all fight.

Desperately Jack held his grasp on his struggling partner. With a feeling of great relief, he saw the half-conscious Kenning slip from his loosening hold of the prospector, and, huffed by the fighters about him, stagger into the mass of tangled forms.

Shortly afterward, Hammond felt a terrific wrench as McKenzie Joe exerted his full strength and broke free. After that, the room became a vague conglomeration of noise and conflict, above which Annie's shrill voice sounded again and again as, her bawling costume torn, her tresses a wreck and her yellow hair streaming, she swung her blackjack and gave blasphemous commands for quiet. Finally the turmoil calmed. The orchestra started again, blaring its loudest. Hammond disentangled himself from the grasp of a 200-pound Swede and looked about for his partner. McKenzie Joe had disappeared.

Jack Hammond went forth into the bush to search for him, although he knew it was useless. Somewhere in this dense forest of stunted spruce and high-thung fir, tangled creepers and matted junipers, McKenzie Joe had gone to his hideout and there was safe. Nevertheless, Hammond kept up the search for the better part of two days. At least here he had freedom from the bars of Kay Joyce.

The story of the fight at Whoopee had swept Lake Sapphire like a hard wind. Beyond that, Bruce Kenning's swollen eyes, his lacerated cheeks and bruised lips had told their story all too plainly to Kay. Now, all her pent-up dislike for McKenzie Joe had surged to the surface. For the first time Jack Hammond found solace away from her. He had found it impossible to answer amiably her vilifications of McKenzie Joe. To Jack's viewpoint, Joe's attack had been the result of brooding, resentful distrust born of no foundations, it is true, but certainly not of the murderous instincts which Kay had attributed to him. The defense, however, had met only a multi-sided barrage, both from the girl and the geologist.

Now, at last, there was a truce. It was the morning of the third day. Jack and the girl stood together near his cabin. Kay had sought him out excitedly, her left hand extended, and in its palm a dozen or more particles of thin gold, the result, she said, of the morning of the third day.

## HOW YOU CAN Attract MEN

Of course, you have no men friends if you've let yourself become dull, cross, and nervous. Men like lively, pretty girls—with plenty of energy to go places and enjoy life.

Don't let love and romance pass you by. Help build up your pep and you, too, should have gay friends.

Here's good advice! Start taking time-proven, reliable Lydia E. Pinkham's Vegetable Compound and note the difference. This famous compound, made especially for women from wholesome herbs and roots, helps Nature tone up your system and thus soothes jittery nerves and gives you more pep to really enjoy life.

Tear out this notice NOW as a reminder to get a bottle of Lydia E. Pinkham's Vegetable Compound TO-DAY without fail.

For over 60 years one woman has told another how to get "smiling" through the female functional disorders with Pinkham's Compound. Let it help YOU.

him backward, momentarily stopping the assault. Then a staggering minor lurched forward.

"Don't jump on a man from behind!" he commanded, attempting to break the younger man's hold. Around the World Annie swept into action.

"Key out of this!" she shouted and swung a blackjack. The man fell. Instantly a roar sounded from a dozen equally drunken pals; all in an instant, Hammond found himself surrounded by milling forms armed with wildly flailing fists of a free-for-all fight.

Desperately Jack held his grasp on his struggling partner. With a feeling of great relief, he saw the half-conscious Kenning slip from his loosening hold of the prospector, and, huffed by the fighters about him, stagger into the mass of tangled forms.

Shortly afterward, Hammond felt a terrific wrench as McKenzie Joe exerted his full strength and broke free. said somewhat jerkily, of the last clean-up. Hammond bent to examine them, only as quickly to turn. Out of a corner of his eye he had caught sight of an approaching figure. It was McKenzie Joe.

Gaunt, gray-featured, but sober, he was approaching from Loon creek. Silently they watched him come nearer; finally Jack said, in a voice tensely laconic:

"Hello, Joe," he said briefly and looked at Kay. "Waiting to tell me what you think of me, eh?"

Kay Joyce whitened. She said nothing. Hammond attempted to cover the situation with a laugh.

"No. Of course not. She's just had a clean-up down at her claim. She's gotten into my dirt."

"So?" The older man strode abruptly forward and stared into her cupped hand. "Washed that out of the gravel, eh?"

"Yes. She bit out the word. McKenzie Joe fixed her with his blood-shot eyes.

"The hell you did!" he snapped. "That's smugger gold."

Kay flung her hand angrily downward, scattering the gold in deep grooves. Her blue eyes gleamed with rage.

"It isn't enough that you should jump on Bruce. Now you include me."

"I ain't jumping on you," said Joe. "I'm just telling Jack that gold never came from your claim!"

(To Be Continued)

## A Happy Province

Vorarlberg in Austria Knows How to Handle Her Affairs

It is a little province in Austria, next door to Bavaria, Switzerland, Liechtenstein, and the Tyrol. Its area is a thousand square miles and its population about 100,000.

Not one great city lifts its spires or smoke stacks in the sky. Yet in the little province, thrift and patience have almost reached a climax. Those little towns and tiny villages are filled with factories which spin and weave.

Each worker has a field or garden which he tends after hours. So well do these men work in their shops that Vorarlberg fabrics find their way over all custom walls to the ends of Europe. And so well do they work that the little farms that their cattle are sought as breeding stock in six lands.

These men are neither rich nor crushed with want. The elders are notoriously pious. Schools abound and illiteracy is almost unknown. Crime is rare, excesses seldom. There are no nobles, no great landowners. For centuries Vorarlberg has been practically self-governing.

It is impossible to measure its affluence. It looks to Switzerland rather than to Vienna. The Vorarlbergers, people say, are like the Swiss.

Their whole land is a garden. They have few resources, yet factories abound. They have no home markets, so the world is their market. They love peace, keep their word, and leave no ragged edges. They are democrats. Their money rings true, their houses are four-squared and spacious, their clothes clean and substantial. They have cash in their pockets and credit in their banks. Their papers are quoted in every land in Europe.

There is not much fun in connection with doing "setting-up" exercises every morning but they do help to keep you fit without any undue strain on your system. This exercise, in conjunction with walking, golf, skating or other seasonal recreational activity, should certainly suffice for the average person.

Do not over-exercise. In this connection we are reminded of Chauncey Depew who, when asked what kind of exercise he took, answered: "I get my exercise acting as pallbearer to my friends who exercise." Dr. H. M. Harrison in "Health" (September).

Flagstones From London

Flagstones from the Tower of London, upon which many royal feet have trod during the 8½ centuries, are being used as a base for the new part of the paving in the courtyard of the British Empire building at the New York world fair 1939.

According to scientists, the temperature of the sun is about 11,000 degrees Fahrenheit.

Oranges are grown on 26,000 farms in California.

Steel wire for bobby pins comes in two shades, eight thicknesses, seven widths, and four finishes.

Among the odd names of streets in London are: "Bread and Rolls Street," "Cook and His Stock Street," "Cold Bath Street," and "Fleek-Herring Street."

So that the worker who first arrived in the morning would be rewarded for his punctuality, Samuel Richardson used to hide half a crown among the type in his printing shop.

Stopped in a Minute

When a person is stopped in a minute, it is usually because of a sudden change in the weather. A sudden change in the weather is usually because of a sudden change in the weather.

## Motor Development

History Of The Beginning In The Building Of Automobiles

The recent death of Charles Duryea, who started building an automobile in 1891, recalls to the Chicago News the long-unsettled dispute over credit for the invention of the motor car. Three standard encyclopedias show little agreement in their listings of inventors who aided in the development of self-propelled vehicles, the grand total being some 57 names.

Nicholas Cugnot built a steam-propelled carriage in France in 1770. He was followed shortly by Oliver Evans in America and Richard Trevithick in England. As automobiles they had little success; as locomotives these experiments were much productive. From time to time during a century other steam carriages were tried out on highways.

The motor car was a little nearer after the work of Gottlieb Daimler and Karl Benz in Germany with the internal-combustion engine in 1880 and 1886. Markus and Krebs were other claimants.

Charles Duryea, who was born on a farm near Canton, Ill., built a car in 1891 and ran it on the highway in 1892. He may have built the following year, is now in the U.S. National Museum, as is one built by Elworth Haynes of Kokomo Ind., in 1894, which is said to be the first one that was practically successful. But there is a long list of disputants—Ford, Olds, Winton, King, Maxwell, Apperson, Riker, Clark Stanley, White, Franklin and Schlemmer to say nothing of George B. Selden to whom all automobile manufacturers at one time paid tribute. He was the author of his basic patents granted in 1895.

(Continued from Page 1)  
The answer is: Through orange juice or tomato juice.

Here is question No. 37:

Q. The author says that before Modern Coffee Creams were invented it was usual to use condensed milk. Nowadays it is usual to use a special kind of milk called by various trade names such as Creamo, Coffee Cream or Cereal Cream. What is the technical name for this special kind of milk?

The answer is: Homogenized milk. Here is question No. 44:

Q. The author says that the growing Boy or Girl who needs milk but does not like it can get flavored milk. Name one kind of flavored milk sold in the Pass?

The answer is, obviously: Vi-Co. Here is question No. 45:

Q. What does the author say saves teeth?

The answer is: Milk.

These questions are not very difficult to answer if you have read the Article, are they? As a matter of fact, the answers are given word for word in the Article. But there will also be a few questions like the following:

Q. Why is it better to buy even

Raw Milk from a substantial Dairy Company with a reputation to make and maintain?

The answer to this is also given in the Article, but the way you word your answer to a question of this sort will indicate whether you have really grasped the significance and importance of it.

In judging, preference will be given to brevity in an answer, as long as it FULLY answers the question. No answer should be more than ten or twelve words long.

The competition will be open to EVERY resident in the Pass regardless of age and regardless of whether or not he is a customer of Meadow Sweet Dairies Limited. This competition is for the purpose of making the Residents of the Pass familiar with the vital facts regarding milk as a dangerous "poison" and milk as "one of the best foods for man." Therefore, no preference or privilege whatsoever will be given to customers of Meadow Sweet Dairies Limited.

See next week's Newspapers for rules governing this competition.

DURING December only—500 sheets Bond paper, in package, size 8 1/2 x 11, good quality, 1 lb. in cardboard box \$1.15. Or 1,000 sheets 5 1/2 x 8 1/2 for \$1.00.—Journal office.

### The Journal's Weekly Letter From Edmonton

(Continued from Page 1)  
ings that the Alberta government is paying the chairman of its conservation board, W. F. Knobe, who was brought in from Texas, \$1,000 a month for his work, and that the other two board members are getting substantial salaries, too.

Premier William Aberhart's announcement that he would go to Ottawa as soon as he could get away from the session, in order to talk with the federal government about refunding of Alberta's \$50,000,000 public debt, was an indication to observers that the provincial government thinks that it is going to be able to get the backing of American finance—providing the dominion government will take over the responsibility by guaranteeing the province's obligations.

Thus the province is going back to the position in which it stood three years ago when the dominion government offered to make refunding possible, providing the Alberta government allowed the dominion to have some voice in affairs in which it would invest a huge sum. That is, the dominion wanted to establish a loan council which would consist of one representative of the federal government, one of the provincial government and one of the bank of Canada, which would handle the refunding. Aberhart and his government refused to give the dominion any rights at all in the matter and therefore passed up Alberta's opportunity. It is indicated now that instead of keeping control over the refunding loans in Canada, the Aberhart government prefers to hand it over to American financiers, dealing through H. B. Reed and J. J. Sousa of Los Angeles. The government has refused so far to state openly the terms on which it is dealing.

Out-of-balance financing to the extent of \$2,768,066 surplus on income account shown in a report of public accounts for the last fiscal year, which ended March 31 last, in an analysis made public by Provincial Treasurer Solon Low last week.

That report was accompanied by an official announcement that the government is going to hold back about \$10,000 of the funds which it is supposed to grant to the Edmonton public school board.

The government has held back half its interest due on its bonds held by the school board, with the result that the school board has lost more than \$30,000 to the government. The board decided to establish the same treatment toward the government and pay it half interest on the school board bonds held by the government.

But the government, scoffing at the Golden Rule, would accept none of the treatment it handed out; it told the school board that if it would not pay the government full interest, the government would hold back enough of the grant to make up the full amount. And that is being done.

As an attorney-general, Aberhart refused to reveal how much the government's Don Quixote fight against windmills has cost Alberta taxpayers; he said he could not tell the legislature how much the province has thrown away on court references on legislation and claims which obviously were ultra vires—when G. F. Powell, former "adviser" here, has said since were known to be illegal when they were passed.

The government's appropriation of \$200,000 to finance the "treasury branches" was set on the path to formal validation by a bill in the house to legalize the system, the branches having already been operating almost two months. Propaganda was not overlooked in the on-extended banks by new attacks on chartered banks, despite the fact that banks offered every possible co-operation to give the government financial backing to prove the idea feasible and workable.
